D. Projected Savings Under Medicaid

Medicaid coverage of transplants is a decision of the individual State. As of 1990, lung transplants were covered by 15 States. We cannot predict whether Medicare coverage will increase the number of State Medicaid programs that will cover lung transplants or whether the Medicare coverage criteria will cause more restrictive policies than would otherwise occur. Medicare coverage of lung transplants will reduce States' payments for transplantation in Medicare beneficiaries who also qualify under Medicaid. To the extent that Medicare payment supplants Medicaid funding, the Federal budget receives an offset for the Federal share of Medicaid expenditures. Under current policy, we estimate the annual offset to be \$5 million.

E. Alternatives Considered

We considered allowing all Medicare participating hospitals to establish transplant programs without additional facility criteria. Our major reason for rejecting this alternative was that it would permit uncontrolled proliferation of transplant facilities, raising questions about the quality of services, given the limited availability of donor organs and experienced teams. Further, because the procedure would be spread among a larger number of facilities, it is likely the average experience level would be lower and would probably result in lower success and survival rates among recipients. Our responsibilities for the well-being of Medicare beneficiaries and for the prudent expenditure of Medicare trust funds dictate that we pursue a cautious policy with respect to a procedure as complex as lung transplantation.

F. Conclusion

We believe that the criteria we have developed are the most effective means available to ensure that the lung transplants that are made available to Medicare beneficiaries are provided in a safe and effective manner so that they can be considered to be reasonable and necessary within the meaning of the law. We believe that the conditions set forth in this notice would maintain the

quality of services required by this complex procedure, provide Medicare coverage of the procedure only at facilities and under conditions that have been shown to be safe and effective, and allow entry of new qualified providers. Although the criteria are somewhat restrictive, we believe this approach is justified, particularly in view of the typical relationship between experience and quality of service.

In accordance with the provisions of Executive Order 12866, this notice was reviewed by the Office of Management and Budget.
